EDIBLE HIMALAYAN SALT

www.alshaikhsalts.com

DE-ICING SALT

De-icing salt lowers the freezing point of water, which helps get rid of ice. The quality & the amount of salt is the major reason for the level of depression. In technical terms, eutectic point is the end point of temperature, below this the salt will not melt ice, it's usually (-21 °C). As per experts the most effective working temperature of de-icing salt is down to -10°C

In winter due to snow or black ice on the roads can lead some serious damage. It can cause accidents, blockage of roads which is equal to paralyze the economy. Moreover, it increases the fuel consumption for vehicles that hit economy in another way, especially for transportation companies.

ANIMAL LICKING SALT

Offering Best Himalayan Mineral Salt for your Animals

A 550 million old Himalayan Rock Salt for Animals, Mined from ancient Himalayan Mountains of Pakistan, And These Salt Licks must be the purest form of salt available. The distinctive pink color comes from the salts mineral content Such as Iron, potassium and magnesium, which are vital for maintaining health of Cows/sheep/goats horses, all have a very well defined appetite for sodium chloride (SALT) only surpassed by the need for water. Because the majorities of plants do not provide sufficient sodium for the livestock/horses needs and may lack adequate chloride, salt supplementation is a vital part of any animal's nutritional requirement
